Mother's Pride.

April 2024 – Present

Full stack developer

in New Delhi

- Developed and maintained core PHP and Laravel-based applications to support business operations and enhance user experiences.
- Managed and updated the websites of various branches, ensuring seamless performance and user accessibility.
- Implemented robust backend solutions and dynamic front-end interfaces to meet diverse project requirements.

Projects

Real Estate Website: Laravel Framework, PHP, MySQL, HTML, CSS, JavaScript

- Developed a comprehensive real estate website using the Laravel framework.
- Implemented user authentication features including login and signup functionality.
- Enabled users to like, save, and search for properties after logging in.
- Created an admin dashboard for managing properties, agents, and additional administrative tasks.
- Designed a responsive and intuitive user interface to improve user experience.

Automatic Label Print: PHP, MySQL, JAVASCRIPT, Bartender, BOOTSTRAP5

- Achieved successful label printing for products, resulting in an **80% reduction** in employee workload
- Streamlined user experience by implementing a user-friendly interface for brand and manufacturing date selection
- Leveraged HTTP requests to seamlessly interact with the **Bartender** system
- Enhanced functionality by incorporating a feature for users to specify the total number of labels needed
- Created a dynamic web page using HTML, CSS, Bootstrap, JavaScript, and PHP

E-commerce website: PHP, HTML, CSS, JAVASCRIPT, MYSQL

- Developed a website to showcase our product with detailed descriptions, pricing, and other relevant information
- Added shopping functionality allowing users to purchase products directly from the website.
- Integrated PhonePe payment gateway to securely receive payments from customers.
- Created an authentication page for customers to verify the **authenticity** of our products using a unique 9-digit code printed on the Product
- Implemented functionality to display product image, MRP, manufacturing details, flavor, batch number, etc. upon entering correct details
- Integrated a feature to display previous users' information, including username, last 4 digits of phone number, and date of usage, if the code has been previously used.

Admin Panel : PHP, HTML, CSS, JAVASCRIPT, MYSQL, BOOTSTRAP

- Maintained data for multiple websites for different brands
- Developed an admin panel to track website visitors and customer authentication
- Implemented a system to record customer purchases and purchasing history
- Created a complaint section to address customer concerns and track complaint status (new, processing, complete)
- Took action on customer complaints based on their status in the system

Attendance System : PHP, HTML, CSS, JAVASCRIPT, MYSQL, BOOTSTRAP

- Developed and maintained the attendance system for the Good Life Nutrition company portal
- Implemented check-in and check-out functionality for employees
- Generated a comprehensive table displaying monthly attendance data for easy tracking and analysis
- Created a user-friendly interface resembling an attendance register, showcasing working hours)

- Enabled the ability to view individual employee attendance records or specific day attendance
